

Advances in Computer Science and Technology (Wit Transactions on Information and Communication Technologies)

This book contains work presented at the International Conference on Computer Science and Technology (ICCST 2014). That work was contributed by researchers, engineers, and academics, as well as industrial professionals. The ICCST 2014 Conference brought these experts together to exchange new ideas and share application experiences, with its main aim to establish business or research relations and to find global partners for future collaboration. Incorporated topics: WEB System and Information System; Computational Linguistics concerning Cognitive modelling of language processing and psycholinguistics, Dialogue and interactive systems, Discourse, co reference and pragmatics among others; Distributed Computing Systems and Cloud Computing together with Cloud Storage, Cloud Service and Cloud Security.
