

Mechanical Science

This volume covers mechanical science for HNC/HND students taking mechanical and manufacturing engineering courses exploring all the topics likely to be covered in both years of such courses. It should also be of relevance to first year undergraduates. Mechanics of materials and mechanics of machines are covered. The text is also suitable for students having followed the BTEC Engineering Science unit or A-level physics. It includes approximately 200 worked examples and 460 problems, all with answers.
