

Sustainability Report: National Renewable Energy Laboratory (NREL) 2003-2004

The National Renewable Energy Laboratory's (NREL) Sustainability Report for 2003-2004 highlights the Laboratory's comprehensive sustainability activities. These efforts demonstrate NREL's progress toward achieving overall sustainability goals. Sustainability is an inherent centerpiece of the Laboratory's work. NREL's mission--to develop renewable energy and energy efficiency technologies and practices--and transfer knowledge and innovations to address the nation's energy and environmental goals - is synergistic with sustainability. The Laboratory formalized its sustainability activities in 2000, building on earlier ideas - this report summarizes the status of activities in water use, energy use, new construction, green power, transportation, recycling, environmentally preferable purchasing, greenhouse gas emissions, and environmental management.
