

Darkness Will Tremble

Christianity will soon be 2000 years old. In those years the underlying principles of Christianity have been successfully applied in every human culture and society on Earth. Christianity has also matured. It survived the upheaval of the dark ages, the politics of young nations bent on controlling it once and for all, and deadly assaults from communist governments. Now, though, we face a new challenge - during what some might call the Intellectual Age. It isn't that Christianity doesn't fit intellectual pursuits because Faith fits very well with philosophical exchange and positive debate. The issue is the drift of humanity toward a god-less regime. Atheism seems to be working to become the defacto religion of intellectuals, artists and politicians alike. With that shift, Christianity is coming under attack from all sides. Primitive religious zealots attack it daily as do the bohemians of Atheism. Atheists consider it haute couture to actively attack the religion of love and faith. This short book examines some of the effects of that assault and offers sound advice for Christians who find themselves the recipient of Atheism's attacks. This season was foretold long ago and has now arrived.
