

Memories - Volume III: Changing the World

This volume of my autobiography is really the autobiography of the technological advances of the sixty five years of my professional life. I was fortunate in always having the right associates, being part of the right team, being in the right place at the right time, and I believe in doing the right thing. Much of that, of course, is luck. On the other hand, I will take full credit for sensing an opportunity, defining a problem, and then solving it. When a door opened before me, I always walked through it. The unknown on the other side always intrigued me. Making a lot of money was never a priority, but helping people and finding the answer to complex puzzles were the priorities. In this, my family life took priority at all times over my professional life. I never found family life to be a burden, but rather, the most important part of my entire life - personal and professional. It was important to me to do the best I could at all times.
